If you have any questions regarding the following Development Coordination comments please call 229-6541

This Final Map Technical Review is based off a Tentative Map that was previously approved in Clark County Jurisdiction (TM-138-13). We note that this site was annexed (ANX-53394) into the City of Las Vegas effective on 7/11/2014 (Document# 20140709:01886, Bill 2014-36, Ordinance 6331) and has been given a zoning designation of R-1.

We also note that the vacation of Pioneer Way and dedication along Grand Teton Drive have recorded while this site was in Clark County jurisdiction. While the dedicated rights-of-way are

transferred to the City upon annexation, the easements granted to Clark County do not transfer to the City of Las Vegas. Therefore, Pedestrian Access Easements must be granted to the City of Las Vegas with this map. The Traffic Easements granted through the owner's certificate is acceptable.

CONDITIONS OF APPROVAL:

1. Grant Pedestrian Access Easements to the City of Las Vegas for all areas where public sidewalks are not within the public right of way. Additionally, show all existing easements on this map.
2. Revise the hatched area in the legend to note that the Public Drainage Easements are to be privately maintained by the Homeowner's Association. Additionally eliminate the language associated with the drainage dimensions for Common Elements "D", "G", and "H" or also note in the dimension that these Public Drainage Easements are to be privately maintained by the Homeowner's Association.
3. Contact the City Engineer's Office at 229-6272 to coordinate the development of this project with the "Grand Teton Storm Drain" project and any other public improvement projects adjacent to this site. Comply with the recommendations of the City Engineer.
4. Dimensions and information presented on the approved civil improvement plans shall match the Final Map prior to recordation. Revise approved civil plans if necessary.
5. Site development to comply with all previous conditions of approval for the Verona Estates Tentative Map (TM-138-13) and all other site related actions.
