

FIRST AMENDMENT

BILL NO. 82-36

ORDINANCE NO. 2292

AN ORDINANCE RELATING TO THE PRETREATMENT OF INDUSTRIAL WASTES; AMENDING TITLE VIII OF THE MUNICIPAL CODE OF THE CITY OF LAS VEGAS, NEVADA, 1960 EDITION, BY ADDING THERETO A NEW CHAPTER, TO BE DESIGNATED AS CHAPTER 9 AND ENTITLED "INDUSTRIAL WASTES," CONCERNING THE CONTROL AND RECYCLING OF INDUSTRIAL WASTES; PROVIDING OTHER MATTERS PROPERLY RELATING THERETO; AND REPEALING ALL ORDINANCES AND PARTS OF ORDINANCES IN CONFLICT THEREOF.

Sponsored by: SUMMARY: This ordinance provides a comprehensive scheme for the control and recycling of industrial wastes.
Commissioner Al Levy

THE BOARD OF COMMISSIONERS OF THE CITY OF LAS VEGAS, NEVADA, DOES HEREBY ORDAIN AS FOLLOWS:

SECTION 1: Title VIII of the Municipal Code of the City of Las Vegas, Nevada, 1960 Edition, is hereby amended by adding thereto a new chapter, designated as Chapter 9 and entitled "Industrial Wastes," reading as follows:

8-9-1: INDUSTRIAL WASTES - PURPOSE AND POLICY

A. This Chapter sets forth uniform requirements for direct and indirect contributors into the wastewater collection and treatment system for the City of Las Vegas (the "City" herein) and enables the City to comply with all applicable State and Federal laws required by the Clean Water Act of 1977 and the General Pretreatment Regulations (40 CFR Part 403).

B. The objectives of this Chapter are:

1. To prevent the introduction of pollutants into the municipal wastewater system which will interfere with the operation of the system or contaminate the resulting sludge;

2. To prevent the introduction of pollutants into the municipal wastewater system which will pass through, the system, inadequately treated, into receiving waters or the atmosphere or will otherwise be incompatible with

1 the system;

2 3. To improve the opportunity to recycle and
3 reclaim wastewaters and sludges from the system; and

4 4. To provide for the equitable distribution of
5 the cost of the municipal wastewater system.

6 C. This Chapter provides for the regulation of direct
7 and indirect contributors to the municipal wastewater system
8 through the issuance of permits to certain non-domestic users
9 and through enforcement of general requirements for the other
10 users, authorizes monitoring and enforcement activities, re-
11 quires user reporting, and provides for the setting of fees
12 for the equitable distribution of the costs resulting from
13 the program established herein.

14 D. This Chapter shall apply to all persons, both
15 within and without the corporate boundaries of the City, who,
16 by contract or agreement with the City, use the City's
17 publicly owned treatment works ("POTW" herein). Except as
18 otherwise provided herein, the control authority shall admin-
19 ister, implement, and enforce the provisions of this Chapter.

20 8-9-2: DEFINITIONS

21 Unless the context specifically indicates otherwise, the
22 following terms and phrases, as used in this Chapter, shall
23 have the meanings ascribed to them as follows:

24 A. "Act" means the Federal Water Pollution Control Act,
25 also known as the Clean Water Act, as amended, 33 U.S.C.
26 1251, et. seq.

27 B. "Approval Authority" means the Administrator of the
28 Division of Environmental protection of the Nevada
29 Department of Conservation and Natural Resources.

30 C. "Authorized Representative of Industrial User" means an
31 authorized representative of an industrial user may be:

32 1. A principal executive officer of at least the level

- 1 of vice-president, if the industrial user is a
2 corporation;
- 3 2. A general partner or proprietor if the industrial
4 user is a partnership or a sole proprietorship,
5 respectively; or
- 6 3. A duly authorized representative of the individual
7 designated above if such representative is respon-
8 sible for the overall operation of the facilities
9 from which the indirect discharge of the industrial
10 user originates.
- 11 D. "Biochemical Oxygen Demand" or "BOD" means the quantity
12 of oxygen utilized in the biochemical oxidation of orga-
13 nic matter under standard laboratory procedure, five (5)
14 days at 20° centigrade expressed in terms of weight and
15 concentration (milligrams per liter (mg/l)).
- 16 E. "Board of City Commissioners" or "Board" means the
17 governing body of the City, consisting of a mayor and
18 four commissioners.
- 19 F. "City" means the City of Las Vegas.
- 20 G. "Control Authority" means the Director of Public
21 Services of the City or such other person as may
22 hereafter be designated by the board to supervise the
23 overall operation of the POTW and charged with certain
24 duties and responsibilities in connection with the ad-
25 ministration of this Chapter, or the duly authorized
26 representative of such person.
- 27 H. "Cooling Water" means the water discharged from any use
28 such as air conditioning, cooling or refrigeration, or
29 to which the only pollutant added is heat.
- 30 I. "Direct Discharge" means the discharge of treated or
31 untreated wastewater directly to the waters of the State
32 of Nevada.

- 1 J. "Environmental Protection Agency" or "EPA" means the
2 U.S. Environmental Protection Agency, and, where
3 appropriate, the Administrator or other duly authorized
4 official of said agency.
- 5 K. "Holding Tank Waste" means any waste from holding tanks
6 such as vessels, chemical toilets, campers, trailers,
7 septic tanks, and vacuum-pump tank trucks.
- 8 L. "Indirect Discharge" means the discharge or the intro-
9 duction of non-domestic pollutants from any source regu-
10 lated under section 307(b) or (c) of the Act into the
11 POTW (including holding tank waste discharged into the
12 system).
- 13 M. "Industrial User" means a source of indirect discharge
14 which does not constitute a "discharge of pollutants"
15 under regulations issued pursuant to section 402 of the
16 Act.
- 17 N. "Interference" means any inhibition or disruption of the
18 POTW treatment processes or operations which contributes
19 to a violation of any requirement of the City's National
20 Pollution Discharge Elimination System permit. The term
21 includes the prevention of sewage sludge use or disposal
22 by the POTW in accordance with Section 405 of the Act or
23 any criteria, guideline, or regulation developed pur-
24 suant to the Resource Conservation and Recovery Act, the
25 Clean Air Act, the Toxic Substances Control Act, or more
26 stringent criteria of the State of Nevada (including
27 those contained in any State sludge management plan pre-
28 pared pursuant to Title IV of the Solid Waste Disposal
29 Act) applicable to the method of disposal or use
30 employed by the POTW.
- 31 O. "National Categorical Pretreatment Standard" or
32 "Pretreatment Standard" means any regulation which con-

- 1 tains pollutant discharge limits promulgated by the EPA
2 in accordance with section 307(b) and (c) of the Act
3 which applies to a specific category of industrial
4 users.
- 5 P. "National Pollutant Discharge Elimination System Permit"
6 or "NPDES Permit" means a permit issued pursuant to
7 Section 402 of the Act.
- 8 Q. "National Prohibitive Discharge Standard" or
9 "Prohibitive Discharge Standard" means any regulation
10 developed under the authority of 307(b) of the Act and
11 40 CFR Section 403.5.
- 12 R. "New Source" means any source the construction of which
13 is commenced after the publication of proposed regula-
14 tions prescribing a section 307(c) National Categorical
15 Pretreatment Standard which will be applicable to such
16 source, if such Standard is thereafter promulgated
17 within 120 days after its proposal in the Federal
18 Register. If the Standard is promulgated later than 120
19 days after its proposal, "new source" means any source
20 the construction of which is commenced after the date of
21 promulgation of the Standard.
- 22 S. "Person" means any individual, partnership, copartner-
23 ship, firm, company, corporation, association, joint
24 stock company, trust, estate, governmental entity or
25 other legal entity, or its legal representative, agent
26 or assign. The masculine gender shall include the femi-
27 nine, the singular shall include the plural where indi-
28 cated by the context.
- 29 T. "Pollutant" means any dredged spoil, solid waste, inci-
30 nerator residue, sewage, garbage, sewage sludge, muni-
31 tions, chemical wastes, biological materials,
32 radioactive materials, heat, wrecked or discharged

1 equipment, rock, sand, cellar dirt or industrial, muni-
2 cipal, or agricultural waste discharged into water.

3 U. "Pollution" means the man-made or man-induced alteration
4 of the chemical, physical, biological, or radiological
5 integrity of water.

6 V. "POTW Treatment Plant" means that portion of the POTW
7 designed to provide treatment of wastewater.

8 W. "Pretreatment" or "Treatment" means the reduction of the
9 amount of pollutants, the elimination of pollutants, or
10 the alteration of the nature of pollutant properties in
11 wastewater to a less harmful state prior to or in lieu
12 of discharging or otherwise introducing such pollutants
13 into a POTW. The reduction or alteration can be ob-
14 tained by physical, chemical or biological processes, or
15 by other means, except as prohibited by 40 CFR Sec-
16 tion 403.6(d).

17 X. "Pretreatment Requirement" means any substantive or
18 procedural requirement related to pretreatment, other
19 than a National Categorical Pretreatment Standard,
20 imposed on an industrial user.

21 Y. "Publicly Owned Treatment Works" or "POTW" means the
22 treatment works, as defined by section 212 of the Act,
23 which is owned in this instance by the City. This defi-
24 nition includes any sewer that conveys wastewater to the
25 POTW treatment plant, but does not include pipes, sewers
26 or other conveyances not connected to a facility pro-
27 viding treatment. For the purposes of this ordinance,
28 "POTW" shall also include any sewer that conveys waste-
29 waters to the POTW from persons outside the City who, by
30 contract or agreement with the City, are users of the
31 City's POTW.

32 AA. "Shall" is mandatory; "May" is permissive.

1 BB. "Significant Industrial User" means any industrial user
2 of the City's wastewater disposal system which (i) has a
3 discharge average flow of 25,000 gallons or more per
4 average work day, or (ii) has a flow greater than 5% of
5 the flow in the City's wastewater treatment system, or
6 (iii) has in its wastes toxic pollutants as defined pur-
7 suant to Section 307 of the Act or appropriate provi-
8 sions of the Nevada Revised Statutes and the regulations
9 promulgated under either, or (iv) is found by the City,
10 State or the EPA to have a significant impact, either
11 singly or in combination with other contributing
12 industries, on the wastewater treatment system, the
13 quality of sludge, the system's effluent quality, or air
14 emissions generated by the system.

15 CC. "State" means the State of Nevada.

16 DD. "Standard Industrial Classification" or "SIC" means a
17 classification pursuant to the Standard Industrial
18 Classification Manual issued by the Executive Office of
19 the President, Office of Management and Budget, 1972.

20 EE. "Storm Water" means any flow occurring during or
21 following any form of natural precipitation and
22 resulting therefrom.

23 FF. "Suspended Solids" means the total suspended matter that
24 floats on the surface of, or is suspended in, water,
25 wastewater or other liquids and which is removable by
26 laboratory filtering.

27 GG. "Toxic Pollutant" means any pollutant or combination of
28 pollutants listed as toxic in regulations promulgated by
29 the Administrator of the EPA under Section CWA 307(a) of
30 the Act.

31 HH. "User" means any person who contributes, or causes or
32 permits the contribution of, wastewater into the POTW.

1 II. "Wastewater" means liquid and water-carried industrial
2 or domestic wastes from dwellings, commercial buildings,
3 industrial facilities, and institutions, whether treated
4 or untreated, which is contributed into or permitted to
5 enter the POTW.

6 JJ. "Waters of the State" means all streams, lakes, ponds,
7 marshes, watercourses, waterways, wells, springs, reser-
8 voirs, aquifers, irrigation systems, drainage systems
9 and all other bodies or accumulations of water, surface
10 or underground, natural or artificial, public or pri-
11 vate, which are contained within, flow through, or
12 border upon the State or any portion thereof.

13 KK. "Wastewater Contribution Permit" means the permit
14 described in Section 6 of this Chapter.

15 8-9-3: ABBREVIATIONS

16 As used in this Chapter, the following abbreviations
17 shall have the meanings ascribed to them as follows:

- 18 A. "BOD" means biochemical oxygen demand
19 B. "CFR" means Code of Federal Regulations
20 C. "COD" means chemical oxygen demand
21 D. "CWA" means Clean Water Act
22 E. "EPA" means Environmental Protection Agency
23 F. "l" means liter
24 G. "mg" means milligrams
25 H. "mg/l" means milligrams per liter
26 I. "NPDES" means National Pollutant Discharge Elimination
27 System
28 J. "pH" means the logarithm (base 10) of the reciprocal of
29 the concentration of hydrogen ions expressed in grams
30 per liter of solution
31 K. "POTW" means publicly owned treatment works
32 L. "RCRA" means Resource Conservation and Recovery Act

1 M. "SIC" means standard industrial classification

2 N. "TSS" means total suspended solids

3 O. "USC" means United States Code

4 8-9-4: REGULATIONS

5 A. No user shall contribute or cause to be contributed, di-
6 rectly or indirectly, any pollutant or wastewater which will
7 interfere with the operation or performance of the POTW.

8 These general prohibitions apply to all such users of the
9 POTW whether or not the user is subject to the National
10 Categorical Pretreatment Standards or Requirements. A user
11 may not contribute any of the following substances to the
12 POTW:

13 1. Any liquid, solid or gas which by reason of its nature
14 or quantity is, or may be, sufficient either alone or by
15 interaction with other substances to cause fire or
16 explosion or be injurious in any other way to the POTW
17 or to the operation of the POTW. At no time shall two
18 successive readings, immediately following each other,
19 on an explosion hazard meter, at the point of discharge
20 into the system (or at any point in the system), be more
21 than five percent (5%) of the lower explosive limit
22 (LEL) of the meter, nor at any time shall any single
23 reading be more than ten percent (10%) of such LEL.

24 Prohibited materials include, but are not limited to,
25 gasoline, kerosene, naphtha, benzene, toluene, xylene,
26 ethers, alcohols, ketones, aldehydes, peroxides, chlo-
27 rates, perchlorates, bromates, carbides, hydrides and
28 sulfides and any other substance which is determined to
29 be a fire hazard to the system;

30 2. Any solid or viscous substance which may cause obstruc-
31 tion to the flow in a sewer or other interference with
32 the operation of the wastewater treatment facilities

- such as, but not limited to, grease, garbage with particles greater than one-half inch (1/2") in any dimension, animal guts or tissues, paunch manure, bones, hair, hides or fleshings, entrails, whole blood, feathers, lint, ashes, cinders, sand, spent lime, stone or marble dust, metal, glass, straw, shavings, grass clippings, rags, spent grains, spent hops, waste paper, wood, plastics, gas, tar, asphalt residues, residues from refining or processing fuel or lubricating oil, mud, or glass grinding or polishing wastes;
3. Any wastewater which has a pH of less than 5.0, or wastewater which has any other corrosive property capable of causing damage or hazard to structures, equipment, and/or personnel of the POTW;
 4. Any wastewater which contains toxic pollutants in sufficient quantity, either singly or by interaction with other pollutants, to injure or interfere with any wastewater treatment process, constitute a hazard to humans or animals, create a toxic effect in the receiving waters of the POTW, or to exceed the limitation set forth in any National Categorical Pretreatment Standard;
 5. Any noxious or malodorous liquid, gas, solid or any other wastewater which, either singly or by interaction with other wastes, is sufficient to create a public nuisance or hazard to human life or is sufficient to prevent entry into the sewers for maintenance and repair;
 6. Any substance which may cause, either singly or by interaction with other substances, the POTW's effluent or any other product of the POTW, such as residues, sludges, or scums, to be unsuitable for reclamation and

1 reuse or interfere with the reclamation process. In no
2 case, shall a substance discharged to the POTW cause,
3 either singly or by interaction with other substances,
4 the POTW to be in non-compliance with sludge use or
5 disposal criteria, guidelines or regulations developed
6 under Section 405 of the Act or any criteria, guide-
7 lines, or regulations affecting sludge use or disposal
8 developed pursuant to the Resource Conservation and
9 Recovery Act, the Clean Air Act, the Toxic Substances
10 Control Act, or State criteria applicable to the sludge
11 management method being used;

12 7. Any substance which will contribute to the POTW's viola-
13 tion of its NPDES Permit or the receiving water quality
14 standards;

15 8. Any wastewater which has objectionable color which is
16 not removed in the treatment process, such as, but not
17 limited to, dye wastes and vegetable tanning solutions;

18 9. Any wastewater which has a temperature which will inhib-
19 it biological activity in the POTW treatment plant and
20 results in interference or causes damage, and in no event
21 shall heat be discharged in such quantities that the
22 temperature exceeds 65°C (150°F) at the POTW and 40°C
23 (104°F) at the POTW treatment plant. Also, the tem-
24 perature of the effluent which enters the sewers, pipes,
25 or other conveyances which lead to the POTW shall not
26 exceed 65°C (150°F);

27 10. Any pollutant, including any oxygen demanding pollutant
28 (BOD, etc.) which is released at a flow rate and/or
29 pollutant concentration which the user knows or should
30 have reason to believe will cause or contribute to
31 interference with the operation of the POTW. Discharge
32 flow rates and concentrations or quantities of pollu-

1 tants shall not exceed at any time flows and con-
2 centrations or quantities that are twice those
3 designated by the National Categorical Pretreatment
4 Standards;

- 5 11. Any waste containing objectionable materials which are
6 toxic to humans, animals, the local environment or to
7 biological or other wastewater treatment processors; or
8 12. Any wastewater containing any radioactive wastes or iso-
9 topes of such halflife or concentration as may exceed
10 the limits established by the control authority in
11 compliance with applicable State or Federal regulations.

12 B. When the control authority determines that a user is
13 contributing any of the above enumerated substances to the
14 POTW in such amounts as to result in an interference with the
15 operation of the POTW, the control authority shall:

- 16 1. Advise the user of the impact of the discharges on the
17 POTW; and
18 2. Develop effluent limitation(s) for such user to correct
19 the interference with the operation of the POTW.

20 C. Upon the promulgation of the National Categorical
21 Pretreatment Standards for a particular industrial sub-
22 category, the national standards, if they are more stringent
23 than limitations and requirements imposed by this Chapter for
24 sources in that subcategory, shall immediately supersede the
25 limitations and requirements imposed by this Chapter.

26 D. State limitations and requirements on discharges into
27 POTWs shall apply in any case in which they are more
28 stringent than the Federal limitations and requirements or
29 those imposed by this Chapter.

30 E. The City reserves the right to establish by ordinance
31 more stringent limitations and requirements on discharges to
32 the POTW if they are deemed necessary to comply with the

objectives presented in Section 1 of this Chapter.

F. No user shall ever increase the use of process water or, in any way, attempt to dilute a discharge as a partial or complete substitute for adequate treatment in order to achieve compliance with the limitations contained in the National Categorical Pretreatment Standards, or in any other pollutant-specific limitation developed by the City or State.

G. Protection against accidental discharges shall be provided in the following manner:

1. Each user shall provide protection from accidental discharge of pollutants or other substances regulated by this Chapter. Facilities to prevent the accidental discharge of pollutants shall be provided and maintained at the owner's or user's own cost and expense. A description of the accident prevention facilities or the procedures to follow in the event of an accidental spill, or both such facilities and procedures, shall be submitted to the control authority for review and approval. All existing users shall complete such a description by January 1, 1983. No user who commences contribution to the POTW after the effective date of this Chapter shall be permitted to introduce pollutants into the system until accidental discharge procedures have been approved by the control authority. The review and approval of such plans and operating procedures shall not relieve the industrial user from the responsibility to modify its facility as necessary in order to meet the requirements of this Chapter. In the case of an accidental discharge, it will be the responsibility of the user immediately to:

(a) notify the control authority of the incident, both by telephone and in writing. The notification

1 shall include the location of discharge, the type
2 of waste, the concentration and volume, and the
3 corrective action taken;

4 (b) take all immediate action to correct the
5 problems and to minimize the problems until correc-
6 tive action can be taken; and

7 (c) submit to the control authority within five (5)
8 days following the accidental discharge a detailed
9 written report describing the cause of the
10 discharge and the measures to be taken by the user
11 to prevent similar future occurrences. Such noti-
12 fication shall not relieve the user of any expense,
13 loss, damage, or other liability which may be
14 incurred as a result of damage to the POTW, fish
15 kills, or any other damage to person or property,
16 nor shall such notification relieve the user of any
17 fine, civil penalty, or other liability which may
18 be imposed by this Chapter or other applicable law.

19 2. A notice shall be permanently posted on each user's
20 bulletin board or in another prominent place advising
21 the user's employees whom to call in the event of an
22 accidental discharge. Each user shall ensure that each
23 of its employees who may cause or suffer such an acci-
24 dental discharge to occur is advised of the emergency
25 notification procedure; and

26 3. Under no circumstances shall a batch or load
27 dumping be construed to be an accidental spill.

28 8-9-5: FEES

29 A. It is the purpose of this Chapter to provide for the
30 recovery of costs for the implementation of the program
31 established herein from the users of the POTW. The appli-
32 cable charges or fees shall be set forth in the City's

1 Schedule of Charges and Fees.

2 B. The board or the control authority may adopt reasonable
3 charges and fees which may include:

- 4 1. Fees for reimbursement of costs of setting up and
5 operating the City's Pretreatment Program;
- 6 2. Fees for monitoring, inspections and surveillance
7 procedures;
- 8 3. Fees for reviewing accidental discharge procedures and
9 construction;
- 10 4. Fees for permit applications;
- 11 5. Fees for filing appeals;
- 12 6. Fees for consistent removal by the City of pollutants
13 which are otherwise subject to Federal pretreatment
14 standards;
- 15 7. Fees for containment and cleanup of accidental
16 discharges; and
- 17 8. Other fees as the City may deem necessary or appropriate
18 in order to carry out the requirements contained herein.

19 C. The fees provided for in subsection B of this Section
20 relate solely to the matters covered by this Chapter and are
21 separate from all other fees chargeable by the City.

22 8-9-6: A. Except as expressly exempted by this Chapter or as
23 otherwise expressly authorized by the control authority in
24 accordance with the provisions of this Chapter, it shall be
25 unlawful for any person without a wastewater contribution
26 permit to discharge any wastewater to the POTW or through any
27 natural outlet within the City or within any area over which
28 the City has jurisdiction to the waters of the State.

29 B. Wastewater contribution permits shall be required,
30 as follows:

- 31 1. Each industrial user which proposes to connect to
32 or to contribute to the POTW shall obtain a wastewater

1 contribution permit before it connects to or contributes
2 to the POTW. Each industrial user which is presently
3 connected to or contributes to the POTW shall obtain a
4 wastewater contribution permit within 180 days after the
5 effective date of this Chapter. Owners and operators of
6 commercial buildings which have no industrial activity,
7 such as hotels and office buildings and domestic users
8 are exempt from obtaining wastewater contribution per-
9 mits with respect to such buildings.

10 2. A user which is required to obtain a wastewater
11 contribution permit shall complete and file with the
12 City an application in the form prescribed by the City
13 and pay an application fee of \$25.00. Each existing
14 user shall apply for a wastewater contribution permit
15 within 60 days after the effective date of this Chapter,
16 and each proposed new user shall apply at least 60 days
17 prior to the date on which it proposes to connect or to
18 commence contributing to the POTW. In support of the
19 application, the user shall submit, in units and terms
20 appropriate for evaluation, the following information:

- 21 (a) The user's name and address and the location of the
22 operation (if different from the user's address);
23 (b) The nature, average rate of production, and stan-
24 dard industrial classification of the operation;
25 (c) The wastewater constituents and characteristics,
26 including but not limited to those mentioned in
27 Section 4 of this Chapter, as determined by an ana-
28 lytical laboratory. All sampling and analysis
29 shall be performed in accordance with procedures
30 established by the EPA pursuant to Section 304(g)
31 of the Act and contained in 40 CFR Part 136, as
32 amended, or with any other method or procedure

- 1 approved by the Administrator of the EPA;
- 2 (d) The time and duration of contribution;
- 3 (e) The measured average and maximum flow of the
- 4 discharge from such user to the POTW, in gallons
- 5 per day, or, when approved by the control authority
- 6 due to cost or feasibility considerations, the
- 7 average and maximum flow of the discharge, as esti-
- 8 mated by verifiable techniques;
- 9 (f) A schematic diagram illustrating discharge and con-
- 10 nection locations to the POTW, with sampling points
- 11 identified. Sizes of the appurtenances will also
- 12 be included;
- 13 (g) A general description of the activities, facilities
- 14 and plant processes which discharge wastes on the
- 15 premises, including all materials which are or
- 16 could be discharged;
- 17 (h) A statement, reviewed by an authorized represen-
- 18 tative of the user and certified to by a qualified
- 19 professional, indicating whether or not the
- 20 pretreatment standards are being met on a con-
- 21 sistent basis, and, if they are not, whether or not
- 22 additional operation and maintenance or additional
- 23 pretreatment, or both additional operation and
- 24 maintenance and pretreatment, are required for the
- 25 user to meet the pretreatment standards and
- 26 requirements;
- 27 (i) If additional operation and maintenance or
- 28 pretreatment, or both, will be required to meet the
- 29 pretreatment standards; the shortest schedule by
- 30 which the user will provide such additional
- 31 pretreatment shall be included. The completion
- 32 date in this schedule shall not be later than the

1 compliance date established in the applicable pre-
2 treatment standard. The schedule shall contain
3 increments of progress in the form of dates for the
4 commencement and completion of major events leading
5 to the construction and operation of the additional
6 pretreatment facilities required in order for the
7 user to meet the applicable pretreatment standards,
8 the dates for hiring an engineer, completing pre-
9 liminary plans, completing final plans, executing
10 the construction contract for major components,
11 commencing construction, completing construction
12 and similar events. No such increment shall exceed
13 9 months unless good cause under extraordinary cir-
14 cumstances is shown, and, not later than 14 days
15 following each date in the schedule and the final
16 date for compliance, the user shall submit a
17 progress report to the control authority including,
18 as a minimum, whether or not the user complied with
19 the increment of progress to be completed on such
20 date and, if not, the date on which the user
21 expects to comply with this increment of progress,
22 the reason for the delay, and the steps being taken
23 by the user to return the construction to the sche-
24 dule established. In no event shall more than 9
25 months elapse between such progress reports to the
26 control authority;

27 (j) Each product produced, identified by type, amount,
28 process or processes and the rate of production;

29 (k) The Type and amount of raw materials processed,
30 stating the average and the maximum of each per
31 day; and

32 (l) The hours of operation of the plant and the pro-

1 posed or actual hours of operation of the pretreat-
2 ment system.

3 3. The City will evaluate the data furnished by the
4 user and may require additional information. After
5 evaluation of all of the data and information, the City
6 may issue a wastewater contribution permit, subject to
7 terms and conditions provided herein.

8 C. Within 9 months after the promulgation of a
9 National Categorical Pretreatment Standard, the wastewater
10 contribution permit of users which are subject to such stan-
11 dard shall be revised to require compliance with such stan-
12 dard within the time frame prescribed by such standard. In
13 addition, when a user, which is subject to a National
14 Categorical Pretreatment Standard has not previously sub-
15 mitted an application for a wastewater contribution permit,
16 the user shall apply for such permit within 180 days after
17 the promulgation of the applicable National Categorical
18 Pretreatment Standard. A user which has a wastewater contri-
19 bution permit at the time that an applicable National Cate-
20 gorical Pretreatment Standard is promulgated shall submit to
21 the control authority within 180 days after the promulgation
22 of such standard the information required by subpara-
23 graphs (h) and (i) of paragraph 2 of subsection B of this
24 Section 6.

25 D. Wastewater contribution permits shall be subject to
26 all provisions of this Chapter and all other applicable regu-
27 lations and user charges and fees established by the City.
28 Permits may contain the following:

- 29 1. The unit charge or schedule of user charges and
30 fees for the wastewater to be discharged into the
31 POTW;
32 2. Limits on the average and maximum wastewater

- 1 constituents and characteristics;
- 2 3. Limits on the average and maximum rate and time of
- 3 discharge or requirements for flow regulations and
- 4 equalization.
- 5 4. Requirements for installation and maintenance of
- 6 inspection and sampling facilities. All domestic or
- 7 sanitary wastewaters from restrooms, showers,
- 8 drinking fountains, and similar sources shall be
- 9 kept separate from all industrial wastewaters until
- 10 the industrial wastewaters have passed through any
- 11 required pretreatment system or device. A control
- 12 manhole of a design approved by the control
- 13 authority shall be furnished and installed by cer-
- 14 tain designated industrial wastewater dischargers
- 15 to facilitate inspection, sampling, and flow
- 16 measurements by personnel of the City;
- 17 5. Specifications for monitoring programs which may
- 18 include sampling locations, frequency of sampling,
- 19 number, types and standards for tests and reporting
- 20 schedule;
- 21 6. Compliance schedules;
- 22 7. Requirements for submission of technical reports or
- 23 discharge reports;
- 24 8. Requirements for maintaining and retaining plant
- 25 records relating to wastewater discharge as spe-
- 26 cified by the City, and affording City access
- 27 thereto;
- 28 9. Requirements for notification of the City of any
- 29 new introduction of wastewater constituents or any
- 30 substantial change in the volume or character of
- 31 the wastewater constituents being introduced into
- 32 the wastewater treatment system; and

1 10. Other conditions as deemed appropriate by the City
2 to ensure compliance with this Chapter.

3 E. Permits shall be issued for a specified time
4 period, not to exceed two (2) years. A permit may be issued
5 for a period less than a year or may be stated to expire on a
6 specific date. The user shall apply for the reissuance of
7 its permit a minimum of 180 days prior to the expiration of
8 the user's existing permit. The terms and conditions of the
9 permit may be subject to modification by the City during the
10 term of the permit as limitations or requirements as iden-
11 tified in Section 4 of this Chapter are modified or other
12 just cause exists. The user shall be informed of any pro-
13 posed change in its permit at least 30 days prior to the
14 effective date of the change. Any change or new condition in
15 the permit shall include a reasonable time period for
16 compliance.

17 F. Each wastewater contribution permit will be
18 issued to a specific user for a specific operation. A
19 wastewater contribution permit shall not be assigned or
20 transferred or sold to a new owner or to a new user and
21 shall not be used at different premises, or for a new or
22 changed operation without the approval of the City. Any suc-
23 ceeding owner or user shall promptly apply for a new permit
24 and shall also comply with the terms and conditions of the
25 existing permit until the new permit is issued.

26 G. Each user shall file compliance reports with the
27 control authority in the manner and at the time as follows:

28 1. Within 90 days following the date for final com-
29 pliance with applicable pretreatment standards or, in
30 the case of a new source, immediately following
31 commencement of the introduction of wastewater into the
32 POTW, any user which is subject to pretreatment stan-

1 dards or requirements shall submit to the control
2 authority a report indicating the nature and con-
3 centration of all pollutants in the discharge from the
4 regulated process which are limited by pretreatment
5 standards or requirements and the average and maximum
6 daily flow, which may be estimated, for those process
7 units in the user's facility which are limited by such
8 pretreatment standards or requirements. The report
9 shall state whether the applicable pretreatment stan-
10 dards or requirements are being met on a consistent
11 basis and, if they are not, what additional operation
12 and maintenance or additional pretreatment, or both
13 additional operation and maintenance and pretreatment,
14 are necessary to bring the user into compliance with the
15 applicable pretreatment standards or requirements. This
16 statement shall be signed by an authorized represen-
17 tative of the user and certified to by a qualified pro-
18 fessional; and

19 2. (a) Any user which becomes subject to a pretreat-
20 ment standard after the date for compliance with such
21 pretreatment standard, or, in the case of a new source,
22 after commencement of the discharge into the POTW, shall
23 submit to the control authority, during the months of
24 June and December of each year unless required more fre-
25 quently in the pretreatment standard involved or by the
26 control authority, a report indicating the nature and
27 concentration of pollutants in the effluent which are
28 limited by such pretreatment standard. In addition,
29 this report shall include a record of all daily flows,
30 which may be estimated, which, during the reporting
31 period, exceeded the average daily flow reported in
32 paragraph 1 of this subsection G. At the discretion of

1 the control authority and in consideration of such fac-
2 tors as local high or low flow rates, holidays, budget
3 cycles, and similar factors, the control authority may
4 agree to alter the months during which the above reports
5 are to be submitted.

6 (b) The control authority may impose mass limita-
7 tions on any user which is using dilution to meet ap-
8 plicable pretreatment standards or requirements, or in
9 any other instance in which the imposition of mass limi-
10 tations is deemed appropriate by the control authority.
11 In such instances, each report required by subpara-
12 graph (a) of this paragraph 2 shall indicate the mass of
13 pollutants in the effluent of the user which are regu-
14 lated by the pretreatment standards involved. Each
15 report shall also contain the results of sampling and
16 analysis of the discharge, including the estimated flow
17 and the nature and concentration, and, when requested by
18 the control authority, the production and mass, of the
19 pollutants contained in the user's effluent which are
20 limited by the applicable pretreatment standards. The
21 frequency of monitoring shall be prescribed in the
22 applicable pretreatment standards. All analysis shall
23 be performed in accordance with procedures established
24 by the EPA pursuant to section 304(g) of the Act and
25 contained in 40 CFR Part 136, as amended, or with any
26 other method or procedure approved by the Administrator
27 of the EPA.

28 H. 1. The City may require to be provided and
29 operated at the user's own expense, monitoring facilities to
30 allow inspection, sampling, and flow measurement of the
31 building sewer or the internal drainage systems, or both the
32 building sewer and the internal drainage systems. The mori-

1 toring facility should normally be situated on the user's
2 premises, but the City may, when such a location would be
3 impractical or cause undue hardship on the user, allow the
4 facility to be constructed in the public street or sidewalk
5 area and located so that it will not be obstructed by
6 landscaping or parked vehicles.

7 2. The City may require ample room in or near
8 such sampling manhole or facility to allow accurate sampling
9 and preparation of samples for analysis. The City may
10 require that the facility, sampling, and measuring equipment
11 be maintained at all times in a safe and proper operating
12 condition at the expense of the user.

13 3. Whether they are constructed on public or pri-
14 vate property, the sampling and monitoring facilities shall
15 be provided in accordance with the City's requirements and
16 all other applicable local construction standards and speci-
17 fications. Construction shall be completed within 90 days
18 following written notification by the City that such facili-
19 ties will be required.

20 I. The City shall inspect the facilities of any user
21 in order to ascertain whether or not the purpose of this
22 Chapter is being met and all of the requirements thereof are
23 being complied with. The persons who exercise control over,
24 and the occupants of, any premises in or on which wastewater
25 is created or from which wastewater is discharged shall allow
26 representatives of the City ready access at all reasonable
27 times to all parts of such premises for the purposes of
28 inspection, sampling, records examination, or in the perfor-
29 mance of any of their duties. The City, the approval
30 authority and the EPA shall have the right to set up on the
31 user's property such devices as are necessary to conduct
32 sampling inspection, compliance monitoring and metering

1 operations, or any combination thereof. If a user has
2 security measures in force which would require proper iden-
3 tification and clearance before entry into its premises, the
4 user shall make all necessary arrangements with its security
5 guards so that, upon presentation of suitable identification,
6 the representatives of the City, the approval authority and
7 the EPA will be permitted to enter, without delay, for the
8 purposes of performing their specific responsibilities.

9 J. 1. Each user shall provide whatever wastewater
10 treatment as may be required in order to comply with this
11 Chapter and shall achieve compliance with all National
12 Categorical Pretreatment Standards within the time limita-
13 tions specified by the Federal pretreatment regulations. Any
14 facility which may be required in order to pretreat
15 wastewater to a level acceptable to the City shall be pro-
16 vided, operated, and maintained at the user's expense. De-
17 tailed plans showing the pretreatment facilities and
18 operating procedures therefor shall be submitted to the City
19 for review and approval. The review and approval of such
20 plans and operating procedures by the City shall in no way
21 relieve the user from the responsibility of modifying its
22 facilities as may be necessary in order to produce an
23 effluent which is acceptable to the City under the provisions
24 of this Chapter. Any subsequent change in the pretreatment
25 facilities or the method of operation thereof shall be
26 reported to and be acceptable to the City prior to the user's
27 initiation of such change.

28 2. The City shall annually publish in a newspaper
29 which has general circulation within the corporate boundaries
30 of the City a list of the users which were not in compliance
31 with any pretreatment standard or requirement at least once
32 during the 12 previous months. The notification shall also

1 summarize any enforcement action taken against each such
2 user during the same 12 months.

3 3. All records relating to compliance with
4 pretreatment standards shall be made available to officials
5 of the EPA and the approval authority upon request.

6 K. Information and data with respect to a user which
7 has been obtained from reports, questionnaires, permit appli-
8 cations, permits, monitoring programs, and inspections shall
9 be available to the public or other governmental agencies
10 without restriction unless the user specifically requests
11 that such information and data be treated as confidential and
12 is able to demonstrate to the satisfaction of the City that
13 the release of such information and data would divulge infor-
14 mation, processes, or methods of production which are
15 entitled to protection as trade secrets of the user. If the
16 City is so requested by the person who furnishes the infor-
17 mation and data, the City shall not make the portions of such
18 information and data which might disclose trade secrets or
19 secret processes available for inspection by the public, but
20 such portions shall be made available upon written request to
21 governmental agencies for uses related to this Chapter, uses
22 related to the City's NPDES permit, or uses related to the
23 pretreatment programs of the State; provided, however, that
24 such portions of a report shall also be available for use by
25 the State or any agency thereof in judicial review or en-
26 forcement proceedings involving the person who furnished the
27 report. In no event, however, shall wastewater constituents
28 and characteristics be recognized as confidential infor-
29 mation.

30 . . .

31 . . .

32 . . .

1 8-9-7: ENFORCEMENT

2 A. 1. The City may suspend the wastewater treatment
3 service to a user or the user's wastewater contribution per-
4 mit, or both the wastewater treatment service and the
5 wastewater contribution permit, when such suspension is
6 necessary, in the opinion of the City or the control
7 authority, in order to stop an actual or threatened discharge
8 of wastewater which presents or may present an imminent or
9 substantial endangerment to the health or welfare of persons
10 or to the environment, causes interference with the POTW or
11 causes the City to violate any condition of its NPDES permit.

12 2. Any person who is notified of a suspension of
13 the wastewater treatment service or the wastewater contribu-
14 tion permit, or both, shall immediately stop or eliminate the
15 contribution. In the event of the failure of such person to
16 comply voluntarily with the suspension order, the City may
17 take such steps as it deems necessary, including but not
18 limited to the immediate severance of the sewer connection,
19 in order to prevent or minimize damage to the POTW system or
20 endangerment to any individuals. The City shall reinstate
21 the wastewater treatment service and the wastewater contribu-
22 tion permit only upon proof that the noncomplying discharge
23 has been eliminated. A detailed written statement in which
24 the causes of the harmful contribution and the measures taken
25 to prevent any future occurrence are fully described shall be
26 submitted by the user to the City within 15 days of the date
27 of occurrence.

28 B. Any user who violates the following conditions of
29 this Chapter, or of any applicable State or Federal regula-
30 tion, is subject to having its wastewater contribution permit
31 revoked in accordance with the procedures set forth in sub-
32 sections C and D of this Section 7:

- 1 1. The failure of the user factually to report the
2 wastewater constituents and characteristics of its
3 discharge;
- 4 2. The failure of the user to report any significant
5 change in its operations or in the wastewater
6 constituents and characteristics of its discharge;
- 7 3. The refusal by the user of reasonable access to its
8 premises for the purpose of inspection or
9 monitoring; or
- 10 4. The violation of conditions of the user's
11 wastewater contribution permit.

12 C. Whenever the City finds that any user has violated
13 or is violating this Chapter or its wastewater contribution
14 permit, the City shall serve upon such person a written
15 notice stating the nature of the violation. Within 30 days
16 after the date of such notice, a plan for the satisfactory
17 correction thereof shall be submitted to the City by the
18 user.

19 D. 1. The City may order any user who causes or
20 allows an unauthorized discharge to enter the POTW to show
21 cause why enforcement action should not be taken against it.
22 A notice of the show cause hearing shall be served on the
23 user, shall specify the time and place of the hearing to be
24 held by the board or its designee regarding the violation,
25 the reasons why the hearing has been ordered, and the pro-
26 posed enforcement action, and shall direct the user to show
27 cause before the board or its designee why the proposed
28 enforcement action should not be taken. The notice of the
29 hearing shall be served personally or by registered or cer-
30 tified mail at least ten (10) days prior to the hearing.
31 Service may be made on any agent or officer of a corporation.

32 2. For the purposes of such hearing, the board

1 may issue, in the name of the City, notices of the hearing
2 and requests for the attendance and testimony of witnesses
3 and the production of evidence which is relevant to any
4 matter involved in such hearing, and may itself conduct the
5 hearing and take the evidence or may designate any of its
6 members or any officer or employee of its Department of
7 Public Services to:

- 8 a. Conduct the hearing;
- 9 b. Take the evidence; and
- 10 c. Transmit a report of the evidence and hearing,
11 including transcripts and other evidence, together
12 with his recommendations, to the board for action
13 thereon.

14 3. At any hearing held pursuant to this Chapter,
15 testimony taken must be under oath and recorded stenographi-
16 cally. A transcript of the testimony will be made available
17 to any member of the public or to any party to the hearing
18 upon payment of the City's usual copying charges therefor.

19 4. After the board has reviewed the evidence, it
20 may issue an order to the user responsible for the discharge
21 advising the user that, following a specified time period,
22 its wastewater treatment service will be discontinued unless
23 adequate treatment facilities, devices or other related
24 appurtenances shall have been installed or the existing
25 treatment facilities, devices or other related appurtenances
26 shall be properly operated in compliance with this Chapter.
27 Further orders and directives as may be necessary and
28 appropriate may be issued.

29 E. If any person discharges sewage, industrial
30 wastes or other wastes into the City's POTW contrary to the
31 provisions of this Chapter, the provisions of Federal or
32 State pretreatment regulations, or any order of the City, the

1 City Attorney may commence an action for appropriate legal or
2 equitable relief in a court of competent jurisdiction in the
3 State.

4 8-9-8: PENALTY

5 A. Any user which is found to have violated an order
6 of the board or which willfully or negligently fails to
7 comply with any provision of this Chapter, and any order,
8 rule, regulation or permit issued hereunder, shall be fined
9 not less than \$50.00 nor more than \$1,000.00 for each
10 offense. Each day on which a violation occurs or continues
11 shall be deemed to be a separate and distinct offense. In
12 addition to the penalties provided herein, the City may re-
13 cover reasonable attorneys' fees, court costs, court report-
14 ers' fees and other expenses of litigation by an appropriate
15 suit at law against any person who is found to have violated
16 any provision of this Chapter or any order, rule, regulation
17 or permit issued hereunder.

18 B. Any person who knowingly makes any false statement,
19 representation or certification in any application, record,
20 report, plan or other document filed or required to be main-
21 tained pursuant to this Chapter, or any wastewater contribu-
22 tion permit, or who falsifies, tampers with, or knowingly
23 renders inaccurate any monitoring device or method required
24 under this Chapter, shall, upon conviction therefor, be
25 punished by a fine of not more than \$1,000.00 or by imprison-
26 ment for not more than six (6) months, or by any combination
27 of such fine and imprisonment.

28 SECTION 2: If any section, subsection, subdivision,
29 paragraph, sentence, clause or phrase in this Ordinance or any
30 part thereof, is for any reason held to be unconstitutional or
31 invalid or ineffective by any court of competent jurisdiction,
32 such decision shall not affect the validity or effectiveness of

1 the remaining portions of this Ordinance or any part thereof.
2 The Board of Commissioners of the City of Las Vegas, Nevada,
3 hereby declares that it would have passed each section, subsec-
4 tion, subdivision, paragraph, sentence, clause or phrase hereof
5 irrespective of the fact that any one or more sections, subsec-
6 tions, subdivisions, paragraphs, sentences, clauses or phrases be
7 declared unconstitutional, invalid or ineffective.

8 SECTION 3: All ordinances or parts of ordinances,
9 sections, subsections, phrases, sentences, clauses or paragraphs
10 contained in the Municipal Code of the City of Las Vegas, Nevada,
11 1960 Edition, in conflict herewith are hereby repealed.

12 PASSED, ADOPTED AND APPROVED this 16th day of June,
