Minutes:

COUNCILWOMAN TARKANIAN declared the Public Hearing open.

CHIEF DEPUTY CITY ATTORNEY STEED indicated that the subject requirements were required years ago when local governments had more jurisdiction. The proposed ordinance would remove those requirements, and that is because many times the information is not

RECOMMENDING COMMITTEE MEETING OF: MARCH 6, 2007

available. COUNCILMAN ROSS was disappointed that no one from Fire and Rescue was present to answer his questions. Hence, he opted to trail this matter until the arrival of someone from staff that could answer questions.

When DEPUTY CITY MANAGER ELIZABETH FRETWELL arrived, she explained that, in reviewing some of the City ordinances, staff found that annual reports were not being provided as required, mainly due to the inability to obtain the information from the Federal Government, who will not provide the information any earlier than necessary. This prompted an evaluation of the need for such a report and whether the information could be provided in a timelier manner. She added that the intent of the original ordinance was probably to enable staff to provide the Council with risk assessments regarding the transportation of hazardous materials. She recommended attainable information be provided on an as-needed basis to the Council.

COUNCILMAN ROSS asked how the frequency of the reports would be determined if not required by ordinance, especially as the number of hazardous materials shipments increase. CITY MANAGER FRETWELL indicated that reports are made regularly as part of the strategic sessions, which includes goals for community risk reduction. Perhaps topics of interest or concern might better be reported quarterly during Council sessions. Regular reports to the Council might include information regarding at-risk businesses that house chemicals. However, if the members of this Committee feel that annual reporting is necessary, then maybe the ordinance should be changed to require the report to go to the Emergency Operations Committee, which is a sub-committee of the City Council.

COUNCILMAN ROSS commented that his primary concern is keeping the lines of communication open, regardless of the method. COUNCILWOMAN TARKANIAN agreed, adding that the Council members have a responsibility to stay informed in order to take action accordingly. Perhaps language revisions would be necessary. DEPUTY CITY MANAGER FRETWELL suggested holding this matter in abeyance to allow staff to work on an amendment with broader language. COUNCILMAN ROSS concurred, noting that the City should be concerned about all issues related to safety.

COUNCILWOMAN TARKANIAN declared the Public Hearing closed.

COUNCILWOMAN TARKANIAN declared the Public Hearing open.

MARGO WHEELER, Director of Planning and Development, stated that this ordinance resulted from a combined effort of Neighborhood Services and Building and Safety after observations by staff, while in the field, of unclear language in the code with regard to, for example, wall separation requirements and kitchen and accessory structure definitions. The language revisions will strengthen and simplify enforcement of the code.

12 **19.12.075: Wall Standards**

13 (A) Front Yard Screen Wall Prohibition. No [screening] screen wall shall be built in the front yard
14 of a residential property.

15 (B) Perimeter and Screen Walls.

16 (1) General. For commercial and industrial properties, ~~a perimeter wall shall be~~
17 constructed adjacent to any residential zoning district or property used solely for residential purposes,
18 shall be a minimum of six feet in height, and in no case shall exceed the height limitation applicable
19 to the adjacent zoning district or property. In all other cases, there is no requirement to construct a
20 wall or fence. However, all perimeter or screen walls and fences must comply with applicable
21 building code requirements. Walls and fences adjacent to commercial or industrial zoning districts or
22 property used for commercial or industrial uses shall be limited to a maximum of eight feet in height.
23 The height of a wall or fence shall be measured from the side with the greatest vertical exposure above
24 finished grade.

25 (2) Height. The minimum height of a [screening] perimeter wall shall be six feet and the
26 maximum height shall be eight feet. The maximum height of a screen wall shall be eight feet.

27 (C) Additional Height Limitations (No Slope or Minimum Slope). Except as otherwise provided
28 in Subsection (E), if the natural slope of a parcel that will contain a [screening] screen or perimeter

1 wall is two percent or less, and a retaining wall will be required:

2 (1) The maximum height of the retaining wall shall be four feet;

3 (2) The minimum height of [the screening] a perimeter wall shall be six feet, with the
4 maximum height for a screen or perimeter wall of eight feet; and

5 (3) The total vertical plane of both walls shall not exceed ten feet, measured from the
6 finished grade on the lower side of the wall to the top of the wall, with a maximum height of eight feet
7 measured from the finished grade on the higher side of the wall to the top of the wall. (See Figure 6)

8 (D) Additional Height Limitations (Greater Slope). Except as otherwise provided in Subsection
9 (E), if the natural slope of a parcel that will contain a [screening] screen or perimeter wall is greater
10 than two percent and a retaining wall will be required:

11 (1) The maximum height of the retaining wall shall be six feet;

12 (2) The minimum height of [the screening] a perimeter wall shall be six feet, with the
13 maximum height for a screen or perimeter wall of eight feet; and

14 (3) The total vertical plane of both walls shall not exceed twelve feet, measured from the
15 finished grade on the lower side of the wall to the top of the wall, with a maximum height of eight feet
16 measured from the finished grade on the higher side of the wall to the top of the wall. (See Figure 7)

17 (E) Increased Retaining Wall Heights. In cases where it is necessary to use retaining walls that
18 exceed the height limitations contained in Subsections (C) and (D), the following standards shall apply
19 in order to reduce the visual impact of [screening] screen walls, perimeter walls and retaining walls,
20 as illustrated in Figure 8:

21 (1) For each four feet of vertical height of retaining wall, a minimum five-foot setback,
22 or horizontal offset, shall be provided, as measured from the front of the wall plane to the front of the
23 next wall plane, with landscaping to be provided within the offset area.

24 (2) The height of the wall plane of the wall located at the highest grade shall be a minimum
25 of six feet and a maximum of eight feet.

26 (F) Front Yard Walls/Fences. Front yard walls/fences shall be a maximum of five feet with the
27 top three vertical feet open to permit visibility. (See Figure 9) Hedges planted along the front yard
28 property line shall not exceed three vertical feet. Retaining walls along the front property line may

not exceed two feet in height. Where the grade of the front yard slopes at a ratio greater than 2:1, multiple retaining walls may be constructed, provided there is a minimum distance of five feet between retaining walls for landscaping. (See Figure 10)

(G) Fences, Walls and Architectural Character

(1) Perimeter Walls. Perimeter walls, end walls, return walls and common area walls shall be decorative and shall be installed by the developer. Acceptable decorative wall materials[,] include, without limitation, stone, decorative block, slump, stone, and wrought iron, and shall have a minimum of twenty percent contrasting material. The contrasting material requirement may be fulfilled by contrasting color, or a combination of contrasting material and contrasting color, if approved by the Department in its discretion. All walls shall include such detail variations as may be required by the Department, including pilaster, decorative caps, decorative iron cutouts or fluted blocks. Any decorative materials or ironwork attached to the top of a perimeter wall shall not encroach into public rights-of-way or abutting properties. Pilasters, if used, shall have a maximum spacing of twenty-four feet on center (See Figures 9 and 11). [No voids or spaces shall be permitted between an existing perimeter wall and a new perimeter wall.] All perimeter walls shall:

a. Match the design of abutting perimeter walls. The established wall design shall be continued until the next street intersection. In cases where the existing wall is considered by the Director to be of unacceptable design, the design shall not be carried beyond the next street intersection unless a transitional wall area designed to soften the differences between the walls is constructed; and

b. [Be sealed by an approved method to prevent leaching or transmission of mineral deposits through the wall; and

c.] Be maintained by the property owner, the developer, a business association or other similar organization, or by such other means as may be approved by the City.

(2) Retaining Walls. Retaining walls which are visible from adjacent properties or rights-of-way shall be decorative and shall be installed by the developer. Acceptable materials for retaining wall construction include split-face block, decorative block, slump stone, stone, caliche rock, colored or exposed aggregate, and textured-finish concrete. All walls shall include detail variations such as

1 pilasters, decorative caps, or fluted blocks. [All walls shall be sealed by an approved method to
2 prevent the leaching or transmission of mineral deposits through the wall.] All walls shall be
3 maintained by the property owner, the developer, a business association or other similar organization,
4 or by such other means as may be approved by the City. In cases where the height of a retaining wall
5 exceeds four feet, a minimum of five shrubs of a five-gallon size, and five shrubs of a one-gallon size,
6 for each twenty feet of linear planting area shall be planted in the area at the base of the wall. In cases
7 where there are multiple-stepped retaining walls, a minimum of five shrubs of a five-gallon size, and
8 five shrubs of a one-gallon size, for each twenty feet of linear planting area shall be planted in the area
9 between the walls and at the base of the lowest wall. A minimum planting area of four feet is required
10 between the retaining walls.

11 (3) Wall Separation. Where a screen or perimeter walls abuts another screen or perimeter
12 wall, the separation shall either be:

13 a. A minimum of three feet from face of wall to face of wall, with access provided
14 to the area between the walls for maintenance; or

15 b. A maximum of eight inches, with the resulting gap between the walls to be
16 filled and capped with a cementitious material that:

17 1. Will not increase the load on the walls; and

18 2. Has been approved by the Planning and Development Department and
19 the Department of Building and Safety.

20 (H) Materials. Unless otherwise approved as part of an overall development plan, the following
21 materials shall not be acceptable for use as [screening] screen or perimeter walls:

22 (1) Chainlink or open wire fencing (except as temporary construction fencing);

23 (2) Razor wire or barbed wire (except as may be approved under the procedures set forth
24 in the City's Building Code);

25 (3) Corrugated metal;

26 (4) Bright colored plastic; and

27 (5) Untextured or unfinished concrete or block (CMU) walls.

28 (I) Variance. The standards set forth in this Section are minimum requirements for all

1 developments subject to this Section. Any request to deviate from these standards shall require the
2 submittal of a Variance application, which shall be subject to the procedures and standards set forth
3 in Section 19.18.070.
