Figure 1 displays a 4x10 grid of 40 small grayscale images. Each image shows a handwritten digit '4' on a white background. The images are arranged in four rows and ten columns. The first image (top-left) is a clear, clean digit '4'. As the index increases from left to right and top to bottom, the digit becomes increasingly noisy, distorted, and eventually unrecognizable, illustrating the effect of the corruption process described in the text.
